Subject: sampling date for EPA's Tower Standard project?

Hi Kristen,

The EPA manager, Bob Egan, requested I contact you to find out when would be a good time to collect the tap water samples from the 15 residences/businesses slated to be sampled for the Tower Standard project. We still have planning documents to submit and receive approval, but I believe we will receive approval on our planning documents by the end of this month.

When would you like the sampling done? Please give me a date range so I can run the dates by our sampling subcontractor REI.

Thanks!

Julie Sharp-Dahl
